

FliteCharts Data Alert 24056

TO: Users of all Garmin aviation products using Canada, United States, or North America FliteCharts® database

DATE: July 17, 2024

CYCLE: 2407

SUBJECT: Incorrect Chart List for some US Procedures

PRODUCT AFFECTED

The Canada, United States, and North America FliteCharts databases for cycle 2407 are affected.

NOTE

Canada FliteCharts is only affected due to the inclusion of Alaskan charts from the FAA. No Canadian procedures are affected.

DESCRIPTION

Some US procedures are duplicated or incorrectly named in the Canada, United States, and North America FliteCharts databases for cycle 2407. Affected charts are listed at the end of this alert.

PILOT ACTION

Do not use the charts listed below.

NOTE

Do not maneuver the aircraft based solely upon the geo-referenced aircraft symbol. As indicated in the pilot's guide, geo-referencing is provided for situational awareness only.

Alerts are written for the currently effective cycle and next cycle. It is possible that data from prior cycles is also affected. Garmin recommends using the latest effective data cycle.

RESOLUTION

The charts will be corrected in the 2408 cycle of the Canada, United States, and North America FliteCharts databases. Cycle 2408 FliteCharts databases are effective August 8, 2024 and will be available August 6, 2024.

Garmin requests the flight crew report any observed discrepancies related to database information. These discrepancies could come in the form of an incorrect procedure, incorrectly identified terrain, obstacles, fixes, or any other displayed item used for navigation or communication in the air or on the ground. Go to [FlyGarmin.com](https://www.flygarmin.com) and select "Aviation Data Error Report."
